

DIDSBURY PIONEER

VOL. 11, No. 32

DIDSBURY, ALBERTA, THURSDAY, AUGUST 10, 1933

\$2.00 per Year. 5 cents a copy

Memorial Service Next Day, 3 p.m.

The Butte should be the scene of a big gathering at the memorial on that place when the Canadian Legion hold their annual memorial service on Sunday.

The laying of flowers in remembrance of fallen comrades by the Legion and friends who care to join in, will be observed.

The memorial service will be conducted by Rev. A. J. Mitchell, chaplain to the local Legion.

The members of the Legion and other returned men will parade at the Odd Fellows Hall at 2.30 p.m. and headed by the band of the Canadian Army Service Corps, Calgary, (by kind permission of Lt.-Col. P. R. Shiels, M.C.) will march to the Butte.

Invitations are extended to all ex-servicemen in the district to join in the parade, and to the general public to join in the service.

Vacation School Great Success

The community vacation school being held in Knox United Church and which commenced Monday, is proving a great success.

The session, which begins at 9.15 a.m. and rises at 11.45 a.m., is taken up with instruction, singing and games, and is proving of growing interest to the children of the town. Over 60 are registered.

The school is in charge of the Misses James and McDonald, of Calgary, assisted by the Misses A. Pearson, M. Pearson D. Huget, and Beth Wrigglesworth, with Mrs. Chamberlain as pianist.

The school continues until Friday, August 18th and all children 4 to 14 years of age are welcome.

Liberal Leader At Olds Friday

Liberal Leader McKenzie King, who is touring the West, will speak at the Arena, Olds on Friday night, August 11th at 8.15.

Mr. McKenzie-King is slated to speak one hour and will afterwards leave for Calgary.

Cent-a-Mile to Vancouver.

Tickets at one cent a mile to Vancouver will be on sale August 18th to September 2nd, limit 15 days.

This is a similar excursion to the one two months ago and which was such a big success.

Particulars can be had from the local C.P.R. agent, Mr. J. A. McGhee.

Harvest Commences.

Cutting of barley is reported on a number of farms both east and west of town, and with good weather the cutting of wheat will commence next week on a number of places.

It is not expected, however, that the wheat harvest will be general for another two weeks.

Can You Beat It?

Mrs. Dave Edwards reports having a vegetable-marrow in her garden measuring 20 inches long and still growing. Can you beat it?

Mr. Ed. Boettger reports enjoying a good mess of corn from his own garden Tuesday. The corn was grown from seed of his own growing. Can you beat it?

Dr. and Mrs. J. E. MacIim and daughter, of Calgary, spent a few days last week with Mr. and Mrs. F. Finley.

The Canadian Legion of the British Empire Service League
Didsbury Branch, No. 106.

MEMORIAL SERVICE

For the Men of the Didsbury District
Who Fell in the Great War, 1914-1918

"They shall not grow old, as we that are left grow old;
Age shall not weary them, nor the year condemn;
In the going down of the sun, and in the morning
We shall remember them."

At The Butte,

Sunday, August 13th, 1932, at 3 p.m.

Obituary.

FRANZ REMPEL

Another pioneer of the Didsbury district passed away when the death of Mr. Franz Rempel occurred on Thursday, August 8th, 1933 at his residence in Didsbury.

Franz Rempel, who was 74 years of age, was born in Russia. He came to Canada 54 years ago at the age of 16 and made his home in Manitoba.

He was married to Justina Peters 34 years ago and they resided in Manitoba until 1901, when they moved to Didsbury and homesteaded 18 miles southeast of town. They retired from the farm 15 years ago and resided in town.

Fourteen children were born of this union, seven of whom preceded him in death. He is survived by his widow, five daughters, Mrs. Henri Bergen, of Samakia; Mrs. W. K. Uman, of Stettler; Mrs. Peter Loewen, of Didsbury; Mrs. Albert Mack, of Calgary; Mrs. P. Jansen, of Didsbury, and two sons, John and Jake, of Didsbury.

The funeral services were held at Berghal Church and burial took place in the cemetery adjoining the church.

Canada Growers Receive \$64,873

Canada's wheat still stood supreme as the world's grain show and conference came to a close at Regina on Friday.

Pocketing the biggest winnings of the \$100,000 in cash prizes, the Dominion's farmers saw their banner at the top of the mast, with hopes that a rising demand for Canadian wheat from foreign countries would cut down the 1933 crop. The experts who attended the conference gave farmers encouragement in disclosing that the European countries wanted Canadian grain.

The big share of the prize money from all grains went to the Dominion. Its growers took \$64,873, more than double the \$25,526 which went to United States growers, and the \$5,221 won by farmers in countries other than Canada and the United States. Approximately \$2,000 of the prize money was not awarded because the judges felt some entries were not worthy.

Lord and Sherrill Nelson returned home from a week's holiday at a boys camp at the Little Red Deer on Friday.

LOCAL & GENERAL

Miss Ruby Farrell, of Edmonton, is visiting with Dr. and Mrs. Clarke.

Mrs. Dawn, of Ghost Pine, was a Didsbury visitor on Sunday and Monday.

Mr. and Mrs. Keeley, of Nanton, former residents of Didsbury, called on a few friends Monday.

Mrs. Todrick and children, of Youngstown, are spending a few days with the former's sister, Mrs. Henry Goehring.

Miss Ruth Brubacher, who has been spending a three-weeks vacation at Sylvan Lake and Banff, returned home Thursday last.

Mr. and Mrs. W. O. Hisland and Earl, Mrs. W. Waycott, Mrs. M. Dean and Mrs. W. Smith, all of Calgary, visited with Mr. and Mrs. Erven Rodney on Friday.

Dr. and Mrs. Clarke and family have left for Edmonton. While away the Doctor will undergo a major operation. They hope to be home by September 1st.

The subject of the sermon at Zion Evangelical Church next Sunday morning will be, "Winning Life's Race," and in the evening, "The Anchor of the Soul."

Mr. and Mrs. H. Halton, of Pincher Creek and Mr. W. H. Moser, of Hillcrest, motored up Sunday to visit Mr. and Mrs. J. W. Halton. They returned home Tuesday.

Coil White and Alf Bruso are touring various lakes north of here. They will visit Pine, Sylvan, Gull, Pigeon, and Cooking Lakes, also Alberta Beach. They don't think they'll have time to visit Great Bear Lake.

Mrs. V. F. Robarge and children Dorothy and John left for their home at Thief River Falls, Minnesota after spending two weeks at the home of her father and brothers, Mr. N. O. Nelson and Eric and Carl Nelson.

A Dog With A Bad Name.

Alignment of the various countries participating in the World Economic Conference at London, England, into a Gold Bloc on the one side and a Sterling-Dollar group on the other, served to rivet attention of the world on the difficulties attending a conference of the kind. There is no gainsaying the fact that the people of all countries participating are anxious to see the conference reach some definite, if not spectacular, conclusions, but, despite this unanimity of desire for adjustment of the economic machine, the burning hunger of all peoples to end depression and restore world trade and world purchasing power, memories of old crises hedge the inflationist suggestions with almost insuperable obstacles. It is a case of the dog with a bad name.

Countries of Europe, which with France and Germany adhere to gold, have painful recollections of their ventures into the realm of uncontrolled inflation. They remember the disastrous sky-rocketing of commodity values in relation to monetary units. They recall the hectic efforts to keep abreast of currency depreciation, and the desperate calculations, involving reckoning in astronomical figures, which maintenance of an ordinary family budget entailed. Inflation to them means printing presses working overtime, and the catastrophic uncertainty of day-to-day business. No wonder then that they hesitate to venture again from the gold anchorage.

Great Britain, the Dominions, the United States, and adherents of the Sterling-Dollar group, have not the same grim experience of frenzied reckoning. Britain hazarded a return to gold and bled herself white in the process of maintaining the standard. So much so that when the country eventually was forced to drop gold, it was with something of relief that the country abandoned its heroic efforts to maintain the pound at gold par, and allowed it to find its own level on world exchanges. The United States, having embarked on a policy designed to raise commodity price levels and revive moribund industry, has seen fit to release the dollar from gold, and is not to be persuaded to hitch it to any other monetary standard until experience has demonstrated the proper level at which it should be pegged for the country's good. The assurance the world now awaits is whether or not the United States will be able to control the inflationary process upon which it is launched.

London news would indicate that, whereas Britain abandoned the gold standard and apparently was allowing sterling to find its own level, in reality the pound, for some time, at least, has been maintained in a position of some relationship with the French franc. Some measure of control, therefore, has been exercised in Britain and, in the result, there has been no appreciable disequilibrium between money wages and commodity values. The possibility is that the United States will pursue a similar course. That is to say, the dollar will be permitted to find a level at which the beneficial effects of the inflation are real and, this position having been reached, a strenuous effort will be made to prevent the inflationary trend from going far enough to negative the good done.

The controversy between the members of the Gold Bloc and those adhering to the Sterling-Dollar group had the effect of forcing Great Britain to declare its inclination. It is noteworthy that, in the result, Britain threw in her lot with the Dominions and the United States, which would appear to indicate that Britain is looking toward those countries rather than to the continent of Europe for the trade opportunities essential to her economic well-being. London dispatches have made it abundantly manifest that the British people are becoming more wedded to the idea of an Empire Economic unit, to the extent that such an idea is tenable. Indeed, at one crisis in affairs of the conference, when definite attempts were made to force its adjournment, there were many proponents of a scheme to organize a second Empire Conference from among the representatives of the British dominions now gathered in London.

The obvious declaration to be made from the propagation of such ideas is that, whatever the outcome of the World Conference, the trade relationships as between the Mother Country and the Dominions overseas are bound to be improved. Contacts established have proved fruitful. British Empire is emphatic for practical application of the Ottawa agreements and for their extension. Canada should not hesitate to capitalize this favorable attitude and with persistence of the primary products moving upwards, the stage is being set for a real revival.

Costs Little To Operate

Small Airplane Weighs Less Than Thousand Pounds Loaded

One of the smallest airplanes built, a two-cylinder Aerona, is proving for his father at the last levee of the its wings, in high altitude flying at season at St. James's Palace, is very the Western Airport at Denver, Colo. fond of wearing the kilt on such occasions more than a mile above sea level, sons of State, which demand full the plane weighs less than 1,000 dress uniform. The reason for the pounds loaded, and can be operated Prince's preference is simply that he for less than \$2 an hour, its owners finds the full dress Guards uniform says. It develops a maximum speed of with its Wellington boots, and light ninety-five miles an hour and main, trousers, which he wears as Colonel tains a cruising speed of eighty-five of the Welsh Guards, gives much has miles per hour. It turns only two and comfort and freedom of movement a half gallons of gasoline an hour, than the loose kilts he wears as The craft is a two-seater cabin Colonel-in-Chief of the Seaforth manoplane. Highlanders.

Grain Elevators Busy

Rise in Wheat Prices Brings Changed Conditions

Saskatchewan wheat elevators are working night and day and there is a much happier situation there than has prevailed for a long time. Hon. Robert Weir, Minister of Agriculture, stated on his return to Ottawa. Mr. Weir has been for several weeks on a visit to his constituency of Melfort, Sask., and also visited much of the surrounding country.

The minister said there was much more wheat in the hands of the farmers than has been realized and they are now disposing of it at 90 cents a bushel and more, with the result that conditions have taken on a brighter aspect. The activity of Saskatchewan elevators was without precedent, Mr. Weir said.

Some 50 municipalities had been badly stricken by the grasshopper plague, Mr. Weir said, and assistance would have to be given them.

Use Russian Lumber

Britain Reported To Be Importing Large Quantities This Season

The Morning Post states Timber Distributors, Limited, a group of British importers, announced in a letter to British firms interested in purchasing timber that they would import 683,000,000 board feet of Russian lumber during the coming navigation season.

The newspaper said Timber Distributors, whose previous plans to import Russian wood were stopped by declaration of the recently lifted embargo against Russian goods, told its clients it was adding 15 shillings to the contract price for the lumber to cover inconvenience caused by the embargo.

Even with this addition, the Post quoted the firm as saying, the price in the British market would be far below anything with which Canadian timber interests could compete.

Completes Cross-Canada Flight

Secretary Of Clubs Finds More Flying Being Done In Cities

George M. Ross, secretary of the Canadian Flying Clubs Association, landed at Sea Island Airport, Vancouver, completing a flight across Canada during which he visited all the Aero clubs en route. He made the final leg from Calgary in eight hours, flying the Moth plane presented to Major-General J. H. MacBrien, president of the aviation league, several years ago. It is the Moth's fourth visit to Vancouver and its fourteenth trans-Canada flight. It has done some 56,000 miles.

Mr. Ross finds more flying is being done in nearly every city. "Fewer Canadians are going to the United States for their aviation training," he said. "In some parts of the east, in fact, the trend is the other way."

Soured On THE WORLD?—THAT'S LIVER

Wake up your Liver Bile

No Calomel necessary

Many people who feel sour, sluggish, and generally wretched make the mistake of taking salts, oil, mineral water, laxative candy, chewing gum, or rogaquine which only make the bowels and ignore the liver. What you need is to wake up your liver bile. Start your liver pouring the daily two pounds of liquid bile into your bowels. Let your stomach and intestines working as they should, once more. Take a Little Liver Pills will soon fix you up. Fully refundable. Safe. Pure. Quick. Ask for Little Liver Pills. Refuse substitutes. 25c. at all druggists.

Railroad Station Nursery

Newest Innovation Established In France Will Be Free

A nursery is the latest innovation to be installed at the Montparnasse Railway Station in Paris which serves Brittany and La Vendée. From 40 to 50 babies may be cared for in this railroad nursery, the first to be established in France, which will shortly be limited in the principal stations of the State Railways. If baby wants a bath, a change of clothing, bottle of milk, an hour or two of sleep, all this will be available at the nurseries, and all of it will be free.

In the last two years 403 women have been appointed nurgistries in London.

The number of illiterates in the United States is 4,283,753. This is a drop of 33 per cent. in a decade.

Cars Are Practically Immune To Lightning

Safest Place For Motorists If Storm Overlooks Them

If you are driving along the highway when an electrical storm comes up, and you seek a nice safe place to stay until the storm passes, just take the advice of experts, and stick right to the driver's seat.

The Bureau of Standards tells us that automobiles are practically immune to lightning despite the fact that rubber tires and the car as a whole become very wet during the storm.

Persons driving within a conducting enclosure are fairly safe against lightning, and the auto body, although enclosed to a considerable extent by glass, approaches this condition.

The average motorist is probably safer than his car during an electrical storm than in his home. Come to think about it, there are mighty few cases on record of autos being struck by lightning. And this is rather remarkable when you stop to consider the hundreds of thousands of cars out in electrical storms, particularly in our larger cities.

Society Doing Good Work

Entomological Society Of London Meeting With Outstanding Success

More than 100 delegates, representing 22 counties, will assemble in London for the three-day centenary celebrations of the Entomological Society of London, England.

Economic entomologists in every country of the Empire are now following the society, and in proof of the value of their work, two outstanding successes may be instanced—the recent reclamation of three million acres of land in Queensland from the prickly pear, and the rescue of the entire coconut industry of the Fiji Islands from a little purple moth which had damaged the trees beyond bearing.

In each case success was achieved by the introduction of a parasitic insect. The world's hope of controlling the migratory locust in Africa and Asia is also dependent on the economic entomologist.

Wonderful Trip For English Schoolboys

Have Left Manchester On Holiday Trip To Morocco

Twenty-six pupils at the Manchester grammar school, who have left for a holiday trip to Morocco, will be the first Europeans to inspect the hitherto forbidden city of Tzchewen. Permission has been granted to them on account of the school's friendly relations with the previous holiday trips with the Sultan and high officials.

In addition to exploring many little known parts of Morocco, the boys will also act as ambassadors for the Lancashire cotton trade. They are taking with them samples of Lancashire cloth in order to impress the people of Morocco with its quality. As a result of doing this on previous visits many of the Moroccan hotels have purchased large quantities of such Lancashire goods as tablecloths and bed sheets.

Boom In Construction

Twenty-Six Cities Plan Building Projects Which Will Total \$169,000,000

Twenty-six cities in Canada expect shortly to undertake engineering and building projects amounting to \$169,000,000, according to a survey made by the national construction council. In all, questionnaires were sent to 54 centres, and it is expected the final figures will reach \$200,000,000.

Twelve local committees are to be appointed at strategic points in Canada, to be formed along similar lines to the national construction council, in order to carry out survey and research work in the various provinces for the national body.

Had New Experience

Canada's Governor-General has met with a new experience. He attended the first baby clinic. Doctors examined 25 lusty youngsters while Lord and Lady Bessborough looked on. The clinic was part of the program staged for their Excellencies as they visited Digby on their Nova Scotia tour.

Greatly Improved Prospects For The Western Canadian Wheat Grower Are Now In Evidence

A bear last year, a bull today, William Smith, wheat buyer for the Scottish Co-operative Society presents a heartening prospect for the wheat growers of Western Canada.

He believes wheat prices will continue firm, and that there will be a good demand for Canadian wheat this fall. While the export market is sluggish because of a speculative flurry in the United States and Canada which has sent North American prices out of line with the world price, the Liverpool price has been climbing steadily and there is a good potential demand.

Importers and millers have been following a hand-to-mouth policy; the quality of the Argentine crop is poor; little Australian wheat is available—all of which indicates a healthy demand for the new Canadian crop.

Nearly half the rise which has occurred in Canadian wheat prices is due to changing currency values, the pound sterling being stronger in terms of Canadian dollars. But world crop conditions have also been a considerable factor in the beige. If speculators have taken undue advantage of these basic factors and have pushed the price out of touch with demand, the margin is not so great but that it will correct itself with comparatively little loss.

Evidently there is a real prospect that the Western Canadian wheat grower will be able to dispose of his crop somewhere around present, or better, levels. That means renewed buying power in Western Canada, better business throughout the Dominion.

The 1933 crop is being produced at the lowest costs ever achieved in this country. Eighty-cent wheat means a fair margin profit on the year's operations for Western farmers. It means that they will have money to spend for clothes, machinery, building supplies, the thousand and one articles which are normally in demand, some of which the farmers have been going without for a year or two because they were compelled to make the old ones do.

Every dollar of new wealth that will be brought to the farmers of the West by profitable wheat prices will mean at least five dollars in distributed purchasing power. The consistent improvement in business activity in the prairie provinces which has been under way during the past two months will work its way rapidly through the whole of Canada as the crop begins to come on the market. The worst of the economic storm is over for the Dominion. The sun has begun to shine again. Business is picking up, and enterprise is sticking its head out of the storm collar. Winnipeg Tribune.

One Motive For Gift

Lindberghs Did Not Want Home Exploited As Show Place

It is entirely characteristic of Colonel and Mrs. Charles Lindbergh that they should take over, as an institute devoted to child welfare, their former home near Hopewell, New Jersey, the scene of so shocking a tragedy concerning a little child. We can conceive of nothing more fitting nor more filled with a tender and imaginative justice. But it is a horrible comment upon American life that one motive of the Lindberghs in deeding the property over to child-welfare work was to save it from various promoters who wished to buy the scene of the Lindbergh kidnapping and exploit it as a roadside. In all the stories of crime, there have been few which have laid bare so many sordid motives as has this one. New York Evening Post.

Holiday Toll Heavy

Lives of 144 men, women and children paid for the celebration in the United States of the 150th anniversary of the republic. Automobiles accounted for 62 deaths, 40 persons drowned, six died as a result of fire-works, and 30 were killed from other accidental causes.

Treadmill Dog Likes Job

Sets Record In Fatigue Experiment At Laboratory

Forty miles of running in six hours, with just one short halt for a drink of water, is a record set up by "Joe" a mongrel dog of large proportions, used in fatigue experiments at the Harvard University Business School Laboratory.

And the peculiar part is that "Joe" loves his job. His job is running on an electrically driven treadmill while scientists study his food consumption, blood circulation, temperature, etc.

The second Joe is released from his cage, he emits a loud "woof" and makes a dash for the treadmill and keeps right on barking until someone turns on the current. Joe can run for hours without getting tired.

The scientific tests are made to determine the organic changes resulting in the body from fatigue and to learn the extent to which fat and sugar substances are used up from exercise.

New Device Valuable

Photographic Appliance Is Of Good Service In Court Trials

Accurate details of scenes of accidents or crimes are claimed to be obtained from use of a new Swiss photographic appliance, according to a report from Consul George R. Hickill at Zurich.

The process is an elaboration and extension of the system of mapping and making topographical surveys by terrestrial and aerial photography. The system produces a stereoscopic view of the objects from which the plot or diagram is automatically scaled. It is claimed that the results are accurate to within one-half inch in the usual street measurements.

The new device is designed only to simplify the procedure of accurately portraying the position, relation and dimensions of vehicles and other objects and highways.

By having the apparatus available at a few central stations it can be rushed to the scene and the photograph completed in a few minutes. The equipment is now in use in Zurich and is reported to be giving satisfaction.

It is claimed that necessary exposures may be made in five minutes that frequent person I events are eliminated and that permanent records may be made available.

Experiment Not New

Hypnotism For Teeth Extraction Used 45 Years Ago

Recent reports about a Pittsburgh dentist who hypnotizes patients before pulling their teeth brought from Rev. C. W. Hadden of Middleboro, Mass., the claim that he had participated in similar experiments 45 years ago.

He produced a clipping from the Newburyport, Mass., Herald in 1887 telling of an operation in which he hypnotized a woman patient before she was treated by Dr. J. M. Brown.

The dentist at the time pronounced the experiment a complete success.

MOUNTIES' UNIFORM CHANGES IN SIXTY YEARS

This year is the Diamond Jubilee of the founding of the famous Royal Canadian Mounted Police, formerly known as the North West Mounted Police. Organized in 1873 to take the administration of justice into the territories then recently acquired from the Hudson's Bay Company, the North West Mounted Police, then numbering 300, started on the long road to fame. Here we see two pictures of the Mounted Policemen. The top photograph shows a "Mountie" as he looks in his spick and span uniform in 1923. The bottom picture was taken at Fort Walsh in 1873, and shows a group of non-commissioned officers in the uniform then worn.

Much Approval Is Expressed Of Dominion-Wide Campaign To Stimulate Interest in Fish Products

Giant Clover Plant

Collector In Seattle Astonishes Botanists With New Find

Smithsonian botanists recently declared themselves astonished. In their hands they held some giant clover leaves sent by J. W. Thompson, a Seattle plant collector. He had found them growing on Washington sage brush slopes. He had never seen their like, nor had the Smithsonian men.

Each plant was nearly two feet high and bore flowers almost two inches in diameter. Most of the 300 species of clover have triple leaves, like the shamrock. There are "lucky" four-leaf freaks, and rare five and seven-leaf varieties. The Thompson specimens have seven leaves normally, which grow on long, eight-inch stems.

The astonishing aspect of the giant Thompson clover is that it should have been discovered so tardily in the U.S., a thoroughly botanized nation. It may be, opined Smithsonian Botanist Conrad Vernon Morton, "one of the last conspicuous new plants to be discovered in the U.S."

Quiet and Unpretentious

The Border Cities Star says "The church wedding of Barbara Hutton and Prince Alexis Mdivani, following the customary civil rites, was, as announced in advance, 'simple, quiet and unpretentious.'" A choir of 30 Russian singers furnished the music; four priests of the Orthodox Church officiated at the altar, the place was jammed to the doors, 20 newspaper and radio camera men perched on the front steps and the crowd in the street tied up traffic for an hour. In other words, no fuss at all."

Joining in a letter to the Dominion Department of Fisheries, a number of fish dealers in Victoria, B.C., recently expressed approval of the campaign of fish cookery demonstrations and lectures which the department is conducting. Naturally, they spoke especially of the program given in their own city a short time ago, but they commended the campaign as a whole. Similar opinions have been expressed by other fisheries people elsewhere.

The purpose of the campaign, of course, is to increase popular interest in Canadian fish foods and their use and thus to benefit the fishermen and fishing industry by widening domestic demand for these products. The demonstrations and lectures are given by Mrs. Evelyn Spencer, the department's specialist in fish cookery, and in recent weeks a field covered has included a number of Prairie Province centres—Edmonton, Calgary, Lethbridge, and Medicine Hat in Alberta, and Regina and Saskatoon in Saskatchewan. As a matter of fact, the field has been very much wider than this great circle, for the program included numerous radio talks which were heard over a wide area, and heard with interest, as was indicated by reports received by the stations.

At the request of the provincial fisheries authorities of Manitoba, a second program is now being given in that province. The first Manitoba program, given last autumn, was found so useful that the provincial authorities asked for additional demonstrations and meetings. After the Manitoba schedule is completed, Mrs. Spencer may speak before some Women's Institutes in Ontario and later in the year, it is expected, she will go to the Maritime Provinces.

Fish from all parts of the Dominion, and fish in different prepared forms, as well as the fresh and frozen product, is used in the different demonstrations. In the prairie cities, for instance, whitefish and pickled trout from prairie waters, British Columbia fish, including some Pacific oysters and Atlantic coast bluffs were all cooked and served to the audience.

Similarly, in the addresses before public meetings and over the radio, Canadian fish foods generally are discussed, not simply fish and shellfish from one part of the country.

A Valuable Shorthorn

Prize-Winning Animal Shipped From Ontario To New Zealand

An aristocrat of the Shorthorn world, Brown Dale Bagler, Canadian National exhibit grand champion and winner of many other purple ribbons, left California, Ont., recently in a specially-fitted and disinfected car for Vancouver on the first lap of a 9,000-mile journey to New Zealand. Brown Dale Bagler was bred by James Douglas and Sons, of Caledonia, and Paris, Ont. His sire, Cruggleton Bagler, was one of the animals imported by the Prince of Wales for the E.P. ranch in Alberta, but was purchased by Mr. Douglas on arrival from Scotland in 1920 for Wilcox Bank Stock Farm here.

The junior grand champion was purchased by the Dominion Livestock Branch for a New Zealand breeder, who asked for one of the best young male Shorthorns in Canada.

Prehistoric Discovery

Said To Constitute The Most Important Missing Link Find To Date

A group of noted geologists from the Orient, headed by Dr. A. W. Grabau, arrived in San Francisco en route to the International Geological Congress at Washington, D.C.

Dr. Grabau announced the discovery of two nearly perfect skulls of the ancient "Peking man" which he said represented "the most important missing link discovery to date."

Dr. Grabau said the skulls and several jaws of teeth were found in rock caves which contained fossils of animals of the million-years-ago period.

Business Cards, special rate of \$1.00 per month (1 inch), or \$11.00 per year if paid in advance.

Notice for Coming Events, 10 cents per line first insertion, minimum 30 cents, 25 cents each subsequent insertion.

Card of Thanks (not exceeding six lines) 50 cents per insertion.

Military poetry 10 cents per line.

Transient advertisements to be paid for when ordered.

Changes of advertisements must reach the office not later than noon Tuesday to ensure insertion in the issue of that week.

J. E. GOODER, Editor & Manager

Believes In Paying Debts.

The following paragraph is taken from a communication to the Edmonton Journal re payment of debts, legislation, etc., and would indicate that this party does not believe in taking advantage of a lot of legislation passed, in order to evade the payment of just debts:

"I do believe the great majority of us farmers would feel disgraced if we deliberately evaded the payment of our debts. The maintaining of our credit is vital. Honest men are entitled to some credit, and during these times they are entitled to protection against harsh creditors, who are a menace to a country, but don't forget the dishonest and lazy debtor is in exactly the same class. Let our laws look after the honest hard working debtor, also the honest creditor, both of whom pay taxes and are the backbone of the state, and set up some other kind of machinery to look after the undesirable class. By all means legislate, but don't legislate for the benefit of this undesirable class, which only means a hardship and a great injustice to a large majority of our people who are in both the debtor and creditor class. Low prices are not going to stay with us forever. Let us encourage those who have funds to extend us credit, and if necessary to bring about such a condition let us revise our laws and repeal any objectionable legislation. United we stand, divided we fall, so let us use what we call a little horse sense and get down to business. Don't let us disgrace ourselves in the eyes of the rest of the world—and Canada in particular."

Good Years Coming?

Three lively years for the automobile industry are foreseen by students of statistics. Most of the motor car world is content that factories are humming merrily along, far past the usual mid-year peak point, with the prospect of sales activity extending through the early autumn at least. But the optimists, after research through twenty years of car production figures, are finding additional rays of sunshine. It is discovered that whenever there has been a strong third or fourth quarter finish to the car sales year, and that seems indicated for 1933, there have generally followed one or two improved car years. In 1915, 1919 and 1921 for example, more cars were produced in the second six months than in the first six months. This was the talisman that seemed to guarantee bigger and better years to follow. These students of figures feel quite sure the current activity in car sales is a forerunner of one or two good years to come.

WEEKLY SERMONETTE

"After every storm the sun will shine; for every problem there is a solution, and the soul's plain duty is to be of good cheer."

BASEBALL.

DIDSBURY vs. CREMONA

The first baseball game of the season on the local diamond was played last Wednesday night, when Didsbury took an easy win from Cremona, the score being 7-1.

Hardy started the game for the home-brews and in 4 innings struck out 5 men and allowed 3 scattered hits. Devolin finished the game and whiffed 4 batters, limiting the hits to 2. Cremona's lone run came in the last inning and was the result of two errors on the same runner.

Didsbury collected 9 hits, with Evans as the big noise with the hickory. He collected two singles and a double in three trips to the plate. Cook played a good game around the keystone sack, and Bob Gulliver at 1st proved to be a real find.

Didsbury: L. Berseht, Wyman, Cook, E. Evans, Gulliver, Hoget, Saunders, Russell, Hardy, Devolin, Woodlock.

Cremona: Springbett, Tronnes, Randolph, K. Whitlow, Shultz, N. Whitlow, Atkins, Hewett and Pearson.

Umpire: Ward Keith.

DIDSBURY vs. GHOST PINE

Darkness halted a first-class baseball game after seven innings had been played Monday night, when Didsbury and Ghost Pine tied at 5-5.

Ghost Pine brought over a fine team of ball tossers, strengthened with the addition of Frank Hess, star catcher and slugger of the Frocha team.

Davidson went the route for the visitors and pitched good ball, Didsbury getting two runs in the third and three more in the fourth, costly errors aiding in the scoring. Hardy started mound duty for Didsbury and pitched a fine game, with Ghost Pine getting two runs in four innings when Devolin went to the mound and finished the game, with the visitors scoring a run in each of the last three innings.

Didsbury: Hardy, Devolin and Wyman.

Ghost Pine: Davidson, Hess.

Umpire: Frank Kaufman.

WEEKLY JOKE

Mrs. Nurich had excellent manners but her husband's were terrible. They were guests at a society leader's home, and while cutting his meat it slipped off the plate and onto the floor. He started to pick it up, but she kicked him violently and said in a whisper, "Apologises, say something!" His face turned red, then white, and with a grin he turned to his hostess and said, "Funny how easy tough meat slides, isn't it?"

REPLACE WORN TRUCK TIRES

NOW, before the hauling season starts in earnest, put on new Firestone tires and be sure that there will be no costly delays from tire trouble.

Firestone Truck Tires have everything to lower hauling costs and give increased mileage. Gum-Dipped cords eliminate danger from blowouts. Two Extra Cord Plies under the Tread make the tire stronger and safer, while the Non-Skid Tread grips the road at all times. These extra values give you 25 to 40% longer tire life at no extra cost.

Have your nearest Firestone dealer put on a set of Firestones before the rush starts. He has a complete stock and gives quick service. See him today.

**ENJOY THE LIFE OF A
CHEVROLET OWNER**

OPEN UP the road map. Pick out some fas-
cinating spot. Then point the nose of your
Chevrolet towards it—and take off!

What does it matter if you must budget on
trips? Half the thrill of owning a Chevrolet is
the way you can pass by the gas pumps—the oil
stations—and the garages. Weather hot? That
doesn't matter either—for Chevrolet has Fisher
No-Draft Ventilation. Just turn on the breeze,
whenever you like, and keep delightfully cool

and refreshed. Roads bad? Who cares—when
you're settled back in this long, full-weight,
smooth-engined Six. A long way to go? Che-
vrolet gives you power galore—pick-up aplenty
—and the secure feeling that Chevrolet
dependability rides with you as you go.

Most of this year's car buyers are leading the
lives of Chevrolet owners—motoring smartly
and economically in Canada's Great Sales
Leader! Low prices and easy GMAC terms.

ADSHEAD GARAGE,

WORLD HAPPENINGS BRIEFLY TOLD

Dr. E. T. Lila Burke, 58 years old, of Morrison, N.J., was the three-millionth visitor to pass through the gates at the World's Fair, Chicago.

Great Britain's unemployment figures show 144,771 fewer unemployed on June 20 than a month before, and 800,235 fewer than a year ago at this time.

Mr. Justice William Alfred Gault, member of the British Columbia Court of Appeal since it was established 24 years ago, has retired because of ill-health.

Subscriptions and collections in the Toronto diocese restoration fund for Western Canada have already reached a total of \$240,061, or slightly more than 96 per cent. of the whole three-year objective.

Experimenters have come within one-quarter of a degree of Centigrade of producing absolute absence of heat. They produced, at the University of California, 159.1 degrees below zero Fahrenheit.

President Roosevelt has assigned two college professors—James H. Rogers of Yale, and George Warren of Cornell—to make a special study of United States government financing and balancing of the budget.

Governments of the United States and Canada have given an interim report from the commissioners set up to arbitrate the "Tim Alone" case, and the next scene in the proceedings will probably be laid in Washington.

The Communist party has taken vigorous steps to bolster up Soviet Russia's faltering railway transport system, ordering immediate creation of "transport political sections" to strengthen labor discipline and weed out hostile elements throughout the entire organization.

Future of the empire marketing board, the organization formed to stimulate sale of empire products in Britain, is still undecided. J. H. Thomas, secretary for the Dominions, indicated no agreement had been reached about dividing expenses of the board between the United Kingdom and other empire governments.

One Way To Decide

Einstein Advances Novel Test As To His Fame In Future

Professor Einstein appears to be something of a wit, for he has propounded a very good test of his fame with posterity. He says that if, in after years, the Germans declare that he was a German, and the French say he was a Jew, then he really was a great man. But if the Germans call him a Jew and the French are emphatic in declaring him a German, then there can be no possible doubt that he was a failure. The mathematician who has outstayed and sometimes puzzled the world by his theory of relativity, is to receive an LL.D. from Glasgow University shortly. He intends to deliver some mathematical lectures at the same time which will be open to the public.

Useful In Many Places

Telescope In Toronto University Would Help Out Often

A two and a half ton glass disk has been ground for the great telescope which is to be installed at the University of Toronto. How useful that telescope would be in the front room of a Chicago flat during the World's Fair. You could see your relations from the country coming to stop at your home before they crossed the county line. There would be plenty of time to hang the sign on the front door, "Gone to Europe. Will Not Return Until Christmas." Chicago Tribune.

Stole Roosevelt's Gun

Possibly the thief who visited the North Dakota exhibit at the Century of Progress wished to have something to make a loud noise on the fourth of July. He took a revolver Theodore Roosevelt used as a young rancher at Medora, N.D. So treasured is the weapon that no questions will be asked if and when it is returned.

W. N. U. 2063

Steamship Tonnage

Gross, Net, Deadweight and Displacement Explained In Simple Manner So The Landsman May Understand

Many people seem at a loss to know what tonnage means. The various kinds of tonnage are often a bit confusing. For the benefit of these the Canadian Line has distributed the following information:

To begin with, vessel tonnage should not be confused with cargo tonnage. A cargo-weight ton is 2,240 pounds, while a cargo-measurement ton is 40 cubic feet. A vessel-measurement ton is 100 cubic feet. The carrying capacity of ships is limited by the amount of measurement space available within their holds, and by the amount of weight they can safely carry. This is called register or deadweight tonnage respectively.

The five kinds of vessel tonnage are as follows:

Gross register tonnage.—The total enclosed space of a vessel, expressed in measurements tons of 100 cubic feet, including engine room, bunker fuel spaces, crew quarters, store-rooms, cargo spaces, etc.

Net register tonnage.—The total enclosed spaces of a vessel available for cargo and passengers, in measurement tons of 100 cubic feet.

Total deadweight.—The number of weight tons of 2,240 pounds, consisting of cargo, fuel stores, supplies and fresh water for the boilers, etc., required to put a vessel down to her marks, her maximum load-line.

Deadweight cargo capacity.—The number of weight tons of 2,240 pounds, which a vessel can carry as cargo after deducting the weight of fuel, stores, supplies, and fresh water required for the boilers, etc.

Displacement tonnage.—The equivalent of the weight of the water displaced by a vessel fully loaded and ready for sea; it is the largest tonnage dimension of a ship, but is not commercially important.

Helped Oil Lamp Industry

Depression Has Increased Working Forces In Glass Factories

Believe it or not, but it took the depression to bring a dying industry back on its feet and start paying dividends.

Increased demand for oil lamp chimneys and lantern globes since hard times had been felt, resulted in the doubling of working forces of a glass company in Fort Smith, Arkansas, and huge increases in others. Glass products have been slumping since the "horse and buggy era."

An offshoot of one of the companies said the oil lamps are cheaper to operate than electric or gas lights. He also asserted the "back to the farm" movement had contributed to prosperity in the industry.

By Ruth Rogers

711
TRIM AND JAUNTY JACKET
DRESS THAT WILL GIVE
DASH TO YOUR SPINNING
WARRIORS

Good looking jacket dress for youth and youthful women types.

It is navy blue thin woolen weave with coral-plaided crinkly crepe silk contrast.

It is effective too in grey crinkly crepe silk with navy crepe.

The jacket has the smart shoulder, that jut out over the arms. And note the interesting back buttoned closing of the dress.

Style No. 711 is designed in sizes 14, 16, 18, 20 years, 26, 38 and 40 inches bust.

Size 16 requires 3 1/2 yards 44-inch with 1 1/2 yards 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

The greatest trouble with the world is that a great majority of people are trying to make something for themselves instead of making something of themselves.

Farm Tractor With Air Balloons Makes New Record

Frank Brisko, noted racing driver at wheel of tractor with which he set an official world speed record of 35.4 m.p.h., has the fastest tractor in the world. The other helmeted racing driver is Chet Gardner, and beside the big tire are Eric Cummings, left and Shorty Cantlon, right—all famous race drivers. Behind the driver is Albert Schroeder, farmer who gave a glowing demonstration with this Firestone air-tired All-Chalmers tractor. At the left is the \$200.00 F.W.D. racing car Brisko drove after the tractor run.

Farm Tractor With Air Balloons Makes New Record

Enthusiasm of farmers for pneumatic tired tractors is making tractor farmers seek higher speeds to make the tractor more valuable for hauling or travel, or for use as an all-purpose farm machine. The most interesting speed performance is the recent official AAA record of 35.4 m.p.h. for five miles made by a tractor at the Wisconsin State Fair Grounds AAA race.

A new four-speed transmission development continued with the pneumatic tire pressure development made possible this unheard of speed.

At the end of the run, Frank Brisko, asked how he liked the ride, and "It was just like driving a passenger automobile."

The big highway speed and comfort now available in farm tractors shows how completely the tractor, with these big tires, serves as an all-purpose machine. Demonstrations in all parts of the country have proved to farmers that tractors using these tires give greater fuel economy in farm operations, greater traction, do not pack seed beds, make the farmer's work easier, and save time as well as money.

Age Was No Drawback

Sixty-Four-Year-Old Woman Has Taken Up Aviation

Being 64 years old, and a woman, has not prevented Mrs. Key Culver from taking up flying at a Pittsburgh aviation school.

Mrs. Culver, known by grease monkeys and pilots alike as "Kittie," tells questioners she is "afraid of nothing."

"It is beautiful," "Kittie" tells everyone. "And I get crazier about it every time I go up."

She passed her preliminary tests with flying colors, records of the U.S. Department of Commerce reveal.

Mrs. Culver has not yet taken her solo flights as she has a few more hours of instruction ahead of her. Her instructors say, however, she is a capable student.

When in Paris in 1906 and 1907 she met Santos Dumont, one of the earliest experimenters with aeroplanes, and dirigibles. He invited her to make flights with him.

"His aeroplane was too frail," she explains, "I didn't want to take my life in my hands."

She adds though that now things have changed and she really likes to fly.

"Kittie" has no permanent home, but spends most of her winters in New York. Formerly she lived in California. She has seen most of the countries of the world by land and now hopes to see them from the air.

Keeps Wheels Moving

Farmer Is Important Factor In World Of Commerce

To the man in the street any attempts to increase production in these days of depressing world surpluses seem a waste of time, or even worse. He forgets, says Mr. L. H. Newman, the Dominion Herald, that the problem of the individual farmer differs vastly from that of the nation as a whole in that the capacity of the farmer to carry on and pay his way is measured in no small degree by the yields he realizes per acre. To the farmer the acre is his unit of production. If his average yields per acre whether converted into milk, mutton or beef or disposed of in their raw state are not sufficiently high to enable him to meet his obligations, he must either succumb entirely or be forced to adopt a standard of living which removes him as an important factor in the problem of keeping the wheels of commerce moving.

A regular Ireland-Scotland air service has begun. Passengers are able to fly from Belfast to Glasgow in less than three hours. The usual time for steamer and train is six to twelve hours. The actual air journey is 75 minutes.

Something To Think About

Canadians Not Bothered With Banking Troubles Like United States

W. L. Clark, writing in Border Cities Star, says some of the banks in Maine have not reopened yet. Closed for about three months, the bank holiday has hit some people hard. Here is a case told about in Portland. A man, formerly of Montreal, had a savings account in one bank. He wanted some money for a business transaction and instead of drawing his savings, he borrowed from the bank and put up some Government bonds as security. Then the bank closed.

The savings account of the man is more than sufficient to cover the loan he got from the bank. But they will not apply that amount against his loan. Instead, they are trying to sell his Government bonds to raise cash to pay off the loan. In other words, they not only have gobbled up the customer's savings, they also want to swallow his Government bonds as well.

This was just one of the sad stories we heard. Another man sold a timber lot for \$30,000, put the cash in the bank one afternoon and the second day following, the bank shut down. He has not been able to touch a cent of the \$30,000 since.

Many a widow, orphan, school, religious institution and other persons or organizations, who could ill afford to lose, had their funds got in the cash.

All Canadians who are talking about what the banks should and should not do might think of these things. Nothing like that has happened in Canada through the present depression.

Encouragement For Spain

Recent Flight Broke Atlantic Record For Distance and Time

In flying from Seville to Cuba the Spanish-built and Spanish-engined "Cuatro Vientos," Captain Barbera and Lieutenant Collar have broken the record across the Atlantic for distance and time. For the encouragement of aviation Spain needed an achievement like this. Her name, it is true, has been kept before the world by intrepid pilots like Commander Franco, who with three other army officers made a flight to South America. In January, 1926, and the following year flew from Spain to Brazil and Argentina, 6,232 miles, in sixty hours; Captains Loriga and Gallarza, who in 1926 accomplished the feat of taking a Spanish plane from Madrid to Mexico and Cape Horn, 11,000 miles; and Iglesias, who crossed the South Atlantic to Bahia, Brazil, 4,200 miles in forty hours less five minutes, March 24-26, 1929.

Spain has given to the world a great inventor in Juan de la Cerva. He chose an autogiro. A Hispania said that it answered the question whether an airplane could be built that would take off and land in a small space, and be practically fool-proof and easy to fly. This odd-looking flying plane has undergone improvements in England and the United States, and has been flown to the Pacific Coast and back. It is still a question whether the autogiro will be able to compete with the standard airplane as a transport machine. For light commercial and pleasure flying it is coming into use.—New York Times.

Cleveland Port-Of-Call

Freighters From Holland Making Use Of Wetland Canal

Cleveland has become a port-of-call for the ocean-going freighters of one enterprising steamship line.

Through use of the Wetland Canal, the freighters, the "Havon" and the "Vredenburg," out of Rotterdam, Holland, have gained entry to the rich Great Lakes ports.

Both vessels are about 250 feet long and draw only about 14 feet of water.

The shipping manager of one large inland concern here declared that freight rates from Cleveland to Rotterdam via water are the same as railroad rates from Cleveland to Baltimore.

LOW PRICED but DEPENDABLE OLDFIELD TIRES made and guaranteed by Firestone

YOU do not have to sacrifice quality and mileage to get a low priced tire. Oldfield Tires—made by Firestone—have the quality and features of tires costing much more.

Only Firestone, with its vast resources and experience, could build such a big, full-sized, rugged tire with a Gum-Dipped cord body and a long-wearing safety tread to sell at such a low price.

Save money with Oldfield Tires. See the nearest Firestone Dealer today.

CHAPTER XIII.—Continued.

As he went out along the slope toward the post, he was realizing, with bitterness of heart, that his sacrifice eighteen months ago, the greatest sacrifice a man can be called upon to make, had been worse than futile. It had cost him dearly, it had brought pain to Joyce, it had brought them tonight to their hour of separation. And yet, through his bitter mood ran

the knowledge that in his sacrifice he had set all personal desires aside and had kept faith with a partner dead and had held sacred his promise to Curt Spaulding, until Elizabeth herself had made that promise impossible of fulfilment.

Again he lived over that hour when he came upon a trapper's deserted, snow-drifted hut, and found Curt dead, stricken with the disease, with both lungs frozen, deserted by his treacherous Indian helper, dying as valiantly as he had lived. He felt that no man on earth could understand the emotion that racked him as he knelt beside the bunk whispering to a partner who was going down into the dark, leaving a sister penniless, alone in the savage North.

"Alan, she loves you," he could hear those broken whispers that presently were stilled. "If you'd marry her—my sister, Alan . . . I wouldn't mind going if I could think of you partner and brother too." And over and over again that dying whisper pined, and the ineffable peace that came when Alan made covenant, "I will, I will, Curt. I love her, too, because she's your sister!"

And now, as he thought of that lone funeral sled trip home, and as he glanced up the slope toward Curt's towering logstake, his lips fastened silently.

"I tried, Curt. You wouldn't have asked more of me than what I did. But it couldn't be, it couldn't be."

Joyce had helped Bill take her personal baggage down to the wharf, and had talked over with him final arrangements about forwarding the peltry to Edmonton and selling the trading store. Waiting for the steamer, she had quietly stepped out of Mrs. Drummond's house into the garden

back of it, telling no one where she had gone.

She was aware that Alan intended to come down before she left, for half an hour with her. She had slipped out in the garden to make that impossible. If he came down to the wharf at the last moment, she felt she could say good-by calmly enough, with a brief handclasp a voyageur's nod and a bow, and he would no longer time with him would be unbearable.

As she stood there, half-hidden by an arbor of morning glories, she saw a dim figure come out along the slope from the direction of the woods edge, and as it passed her, scarcely a dozen feet away, she recognized Alan. He went on to the factor's house. She heard him knock, heard him ask for her, heard his puzzled "That's odd," when Mrs. Drummond said she'd been gone for half an hour.

By a lightning flash Joyce saw him as he started on past her. Something in his manner, in his dejected head, in his slow beaten gait, let her know he was aware she deliberately had gone away in these last minutes and deliberately had shunned a parting talk with him.

As Alan went slowly past the garden, unconscious of the lightning flashes, thinking only that Joyce, who had burned his picture and his gift, was now refusing a last hour with him, he heard a voice in the wintry blackness. It sounded like his name. In surprise he whirled toward the arbor of morning glories, and as he stood there, listening, he heard it again—his name—Joyce's voice, half-sobbing.

"Alan! Don't—don't go. . . . I'm—I'm here. . . ."

CHAPTER XIV.

The North's Call

As she worked on a report that creating in the little library nook, Joyce would pause now and then and listen intently, with her dark eyes peering into the blackness outside the window.

It was time for Alan to be returning with Bill and Ted from a patrol down the Mackenzie. In the sharp vigorous gusts of October wind she kept thinking she heard the drone of the launch. Across the room, over, on a blanket-padded couch, little Marion Montgomery had fallen asleep over a picture book, her tiny moccasins off, one arm hanging over the couch. In the deep dreamless sleep of lathhood the little tot was oblivious of the threat and snarl of autumnal wind swirling around the cabin. If there was any sacrifice in having that airy little companion in her home, Joyce had not yet become aware of it.

The report she was working on was a statement to her former bureau chief in Ottawa of the money expended in her work among the Indian women around Endurance.

During a lull in the wind she suddenly heard the unmistakable sound of the big police boat skimming up the wave-tossed Mackenzie. Pattering aside her report, Joyce creased being Deputy Indian Agent at Fort Endurance, N. W. T., and became the wife of Inspector Baker, officer commanding there. With a glance at the sleeping tot she flung a cape about her shoulders and went out the cabin and ran down the dark winding terrace toward the wharf.

When the yellow eye of the launch drew near, Joyce saw a tall figure step upon the prow half-deck and stand ready by the painter chain.

When he jumped out upon the plank, jerking the launch alongside and lapped the painter around a pierhead, he turned to her, hat in hand, reproaching her:

"Girl, girl, you shouldn't have come down here in this raw wet wind. You're got to begin learning to be careful!"

Pedemont snapped off the launch searchlight; and as the two men began gathering their packs together, in the mantling darkness Joyce re-

WEAK WOMEN Take Lydia E. Pinkham's Vegetable Compound

Have you ever felt that you were too weak to do anything? That you did not have the strength to do your work? Women who are weak and run-down should take a tonic such as Lydia E. Pinkham's Vegetable Compound. The result is a new, sun-dew condition often yield to this marvelous medicine. 10 out of every 100 women who report to us say that they are benefited by this medicine. Buy a bottle from your drug-gist today . . . and watch the result.

lenced Alan's reproach, rising on tiptoe, oblivious of his wet slicker and the cold steel of his gun buckle.

After supper, when Alan had made himself regimental again after the six-days hard patrol, he stepped out into the living room where Joyce was finishing her report.

She beckoned him over to her, holding out several letters which had come for him on the Chipewyan mail. She had not opened them; but now when he brought a chair beside her, she read them with him.

Buzzard had dashed off a page from his apartment address in Winnipeg. He had "done" a couple dozen fairs and pumpkin shows in his new Exhilarand, but had found that time too tame. Right now he was flying the Winnipeg-Edmonton lap of the Air Mail. Next spring he was going to boss the "smoke hawk" division of the Manitoba Fire Prevention, with a circus of ten scouting "planes" under him.

"Some time this winter (he postscripted), we might put sleds on the crate and hop down north to visit you. But Alan, you and out first if Joyce holds anything against me for telling you she burned that rainbow flag. I don't think she ever has forgiven me."

Joyce looked up, laughing, but with a catch in her voice as she remembered that haunting day.

"Did you notice the 'we,' Alan? He puts her into a postscript! She's like a nurse afterthought. 'Who is she?'"

"Louise of Kamloops, is all I know," Alan answered.

The next envelope was an enigma. It contained no message, no writing—nothing but two pictures. One was a panorama of a large country estate, with lawns, servant quarters, gardens, orchards. The other showed an imposing town residence, a stone building overruled by ivy, with a limousine waiting in the doorway.

Bewildered, Alan looked at the pictures twice, searched in the envelope for a possible note, glanced again at the address. And then, as he studied the crest of the envelope, he started a little. This was from Elizabeth! That insignia was the Lamroth-Haskell crest! Since Haskell married her and they left the North, they had written to on it at Endurance; but Alan had heard that Haskell, transferred to a small detachment in the Kootenay coal fields, had resigned and gone east.

Suddenly understanding the pictures, Alan looked up at met Joyce's eyes, and he saw that she too understood. In a kind of scorn she remarked:

"That's like Elizabeth, isn't it, Alan? She wants you to realize she's at a country estate and town house and uniformed chauffeur and all the things that—that."

"Say it!" Alan bade. "—All the things I'd never been able to give her. She's trying to rub it in. Yes, it's like her, Joyce."

"Sometimes I pity her a little—with him, Alan."

"I wouldn't say that, Joyce. I know her better than you did. I'd say, God pity him—with her."

With a gesture of finality he flipped the pictures contemptuously into the fireplace.

Later, when the lights of the post were out, when the fire logs had burned to red coals and Joyce had carried her sleepy little charge away to bed, they went outside the cabin. In the night sky they heard the honking of Arctic geese, past of the migrants, winging swiftly south; and they had the feeling that in the illimitable woods all furry creatures were seeking out warm dens and storing food for the frozen months. Up and down the wilderness rivers and furling over the Strong-Woods a whisper had gone abroad of a mighty change brooding a whisper that drove less courageous things into headlong flight, yet was but a challenge to those more valiant of heart. The spirit of winter was in the air tonight; and Alan and Joyce were welcoming it. Here in the far North they had lived through other winters; they knew the savagery of those months and their white silent beauty too. They had work to keep them busied during the long dark, and a home against the blind swirling blizzards, and the vista of a life together here in this far land of their choosing.

Youth Seen In Attempt To Adjust

Stirred by modern youth's desperate efforts to adjust itself to the complicated demands made by life and a rapidly changing world, Edna Robb Webster, noted serial story writer, has given her attention to the problem in her latest book, "Occasional Wife," a romance of modern marriage. The story begins in this paper at an early date.

Mrs. Webster takes as her two chief characters, Camilla Hoyt, adopted daughter of a wealthy family, and Peter Anson, poor and struggling artist. They love each other, and want to marry. Camilla, whose foster mother, wants her to marry for money, is not to share in her family's wealth when she comes of age, but she is trying to carve out a career for herself as a commercial artist. To marry Peter and saddle him with the responsibility of her support and happiness would mean, so Camilla thinks, the sacrifice of his already promising career. So she evolves a unique marriage plan.

Mrs. Webster's serial stories are known wherever newspapers are printed. She has written many favorites, among them "Dad's Girl," "Joretta," and "Lipstick Girl."

Control News Broadcast

Commission Has Issued Instructions To All Canadian Stations

Instructions have been issued to all radio broadcasting stations in Canada to the effect that as from July 17, they would not be allowed to broadcast items other than those provided by the Canadian Press or some other licensed news agency in the Dominion of Canada. Beginning on that date the Canadian Radio Broadcasting Commission has been furnished with news bulletins for ten five minute broadcasts daily, including Sunday.

In Saskatchewan, Manitoba and Alberta the broadcasts will be at 7:25 and 10 p.m., central standard time.

More ships are visiting the Virgin Islands than a year ago.

Burnside Notes.

There will be a dance in the Lone Pine Hall this Friday evening, Aug. 11th.

Lone Pine W.I. will meet in the hall next Thursday, August 17th, when Mrs. Eckel will be hostess.

Mr. Lewis McCulloch spent Monday in Calgary.

Mr. and Mrs. N. Eckel were Sunday visitors at Winborne.

Mr. and Mrs. Sidney Gilson and family have moved into the teacherage at Jutland school.

Mr. and Mrs. Jack Colwell, of Calgary, spent the weekend with Mr. and Mrs. Hugh McLean.

Mrs. Bert Pross and family and Mrs. Emily Hunter and family are camping at Sylvan Lake.

Mrs. Charles Mardon is spending a couple of weeks with friends in Calgary.

Miss Elsie Topley, of the Royal Alexandra Hospital, Edmonton, has been spending a two weeks' vacation at her home here.

Miss Bessie Rist, of Los Angeles, California, who has been spending a couple of weeks with her brothers Chester and Joe, motored back on Friday to Shelby, Montana, where she will visit another brother before returning home.

RUGBY NOTES

Rugby W.I. met this month at the home of Mrs. Farrant, with 17 members and some visitors present. Mrs. G. Young gave an excellent report of the conference at Carstairs. It was arranged for members to meet at Mrs. Clarke's in the afternoon of August 8th to card wool. Mr. Henner, of the Super-Health Aluminum Co. gave an instructive talk on the necessity of correct diet. Mrs. G. Jackson entertained with a recitation, "The Other Fellow's Job," followed with a violin selection from Miss Helen Wahl, accompanied by Mrs. Bolton. The meeting closed with "God Save the King," and lunch was served. The September meeting will be held at the home of Mrs. D. Evans.

Judging by the number of cars coming from the east and west to meet at the Harvey Hosgood place on the night of July 31st, those not in the secret would have thought something out of the ordinary was going on. We hope the newlyweds enjoyed the secret music that came from horns, cowbells, etc., but we are quite sure the Yorkshires didn't enjoy it, as the pen was quite empty next morning. Anyone seeing stray Yorkshires please notify Harvey Hosgood. The crowd later repaired to the Rugby schoolhouse, where the remainder of the night was spent in dancing. A very enjoyable time was had by all. Who's next?

DIDSBURY SCHOOL DISTRICT No. 652

Tenders Wanted

Tenders will be received for the painting of the exterior of the High School building.

Tenders will also be received for the kalsomining and varnishing of the interior of both Public and High Schools.

Particulars can be obtained from Messrs. J. V. Berscht or J. W. Halton.

Sealed tenders must be in the hands of the undersigned not later than 6 p.m., Saturday, August 12th, 1933.

Lowest or any tender not necessarily accepted.

A. C. Fisher, Sec.-Treas

MELVIN SCHOOL DISTRICT

Tenders Wanted

The undersigned will receive tenders until August 15th, 1933, for the labor of kalsomining and cleaning of the schoolhouse, the cleaning of the stables and the painting of the school barn.

For further particulars apply:

Geo. Young, Sec.-Treas

LOCAL & GENERAL

Dance at the Community Hall Friday night, August 11th. The Clemens-Bellamy 4-Piece Orchestra.

Mr. and Mrs. Erven Rodney and Jimmy Nelson spent Sunday at Cochrane.

Mr. David Halton, of Pincher Creek, is visiting his brother Mr. J. W. Halton for a couple of weeks.

Mrs. V. F. Robarge and Dorothy spent Friday with her aunt, Mrs. Mary Rodney.

Miss Ruby Kercher underwent an operation for appendicitis at the Didsbury Hospital on Saturday last.

Mrs. and Mrs. J. V. Berscht, Len and Jo left for Edmonton on Tuesday and will spend their holiday in that district.

Tommy Johnson and Clint Reiber are somewhere in British Columbia this week. They took lots of fishing tackle.

Mayor gives up law for politics, and committee investigates his love life. See Lee Tracy in "Night Mayor," as the man who put the "IT" in politics. At the Didsbury Opera House this Friday and Saturday.

Mr. and Mrs. Harry Shantz, who have been visiting relatives and friends in Didsbury, have returned to their home at Vallejo, California. Mrs. Annie Shantz accompanied them and will spend the winter with her son.

Henry Wright wishes to thank all who so generously contributed to his draw. Winning numbers were No. 50 ("The Ship") Syd Wright and No. 28 ("The Elk") Ed Ford. Wright has now another draw on hand for eight pictures—four in oil and four water color. Subscriptions may be made to H. Wright at "The Mansion," or to Messrs. Johnson & McCloy, the barbers. A hundred members at \$25 each or 5 chances for 65c.

Mr. Henry Hansen informs us that his cow, "Glenwillow Barbara," which won the Ayrshire Club Cup, was only 3 years old and that she won in competition with mature cows. He also informs us that he had three cows in the E.O.P. tests and they all made splendid records. Mr. Hansen's herd is headed by an imported bull which he obtained from the provincial government herd at Claresholm.

BIRTHS

July 28th, 1933, to Mr. and Mrs. Lloyd Hehn, a daughter.

July 31st, 1933, to Mr. and Mrs. Horatio Shiels, a daughter.

August 6th, 1933, to Mr. and Mrs. Dave Boettger, a daughter.

KNOX UNITED CHURCH NOTES

Service will be held at the Knox United Church on Sunday evening next at 7.30, when the Minister's sermon subject will be, "Gideon and his 300 Men."

CARD OF THANKS

We wish to thank all our neighbors and friends for their kindness and sympathy during our recent bereavement.

Mrs. Franz Rempel and Family.

Crows Destroy 125 Bird Eggs.

How much damage do crows do in despoiling other birds' nests? Game Warden Charles Still, at Vernon, B.C. found a partial answer when he counted the shells of 50 pheasant eggs within an area 12 ft. square, where a pair of crows had their retreat. Nearby were other shells, bringing the total to about 125. The crows were destroyed.
